**PRESS RELEASE****The WaterPOD job site protection launched by Cla-Val Powered by reed water**

Toronto, July. 25, 2021 - Cla-Val, the world leading manufacturer of automatic control valves has launched a new intelligent job site protection product, The WaterPOD.

The complete, factory-built & tested, modular automatic control valve comes complete with an integral flow meter and is best suitable to protect high rise projects during the course of construction. The WaterPOD protects contractors and developers/builders with risk mitigation while they build and shortly after. With real-time monitoring of domestic water and fire protection lines in a building, the system is able to alert operators of a water escape events and shut off the water remotely via reed cloud service.

"Cla-Val automatic control valves provide decades of service in high rise buildings. The new WaterPOD ensures protection to developers reducing their project risk and insurance premiums", explained Peter Sucharda, President at Devine & Associates, Cla-Val Ontario manufacturer representative.

"We understand the most vulnerable period of a building life is while its being built and the need to protect it from water damages during this sensitive period", explained Adam Bartman, reed's Co-Founder and Solution Architect.
